The daily attendance report is a comprehensive simple-to-use tool. When a case manager logs on, their default view is the daily attendance report for their kids. The absent kids are shown alphabetically at the top of the report and the kids in school (those with IN timestamps) are shown alphabetically at the bottom of the report. This allows the case manager to immediately see which of their kids are not in school. Clicking on the column headings allows an ascending or descending resort of the information. Clicking on the “Add Note” link allows case managers to enter both the attendance code and reason for absence and send an email to the JPO.
